

ZeroGravity® Mopping System

Lightweight yet sturdy, designed for all surfaces

The ZeroGravity® mopping system by Contec Professional is a unique concept in cleaning. The incredibly lightweight handle and frame options offer an ergonomically friendly alternative to traditional mops. When combined with the Premira® Microfiber Mop Pad, mopping becomes faster and more compliant.

The ZeroGravity Mop Frame features a uniquely curved shape. This helps ensure the entire mop pad is used, instead of just the edges, as with typical mops. Also, it is 100% recyclable and has a low profile, making cleaning under objects, furniture, and equipment easier than ever. The ZeroGravity aluminum handles are strong, durable, and available in a variety of lengths—ready for use in most cleaning applications. The ZeroGravity Mopping System is ideal for any facility, providing outstanding results and exceptional value.

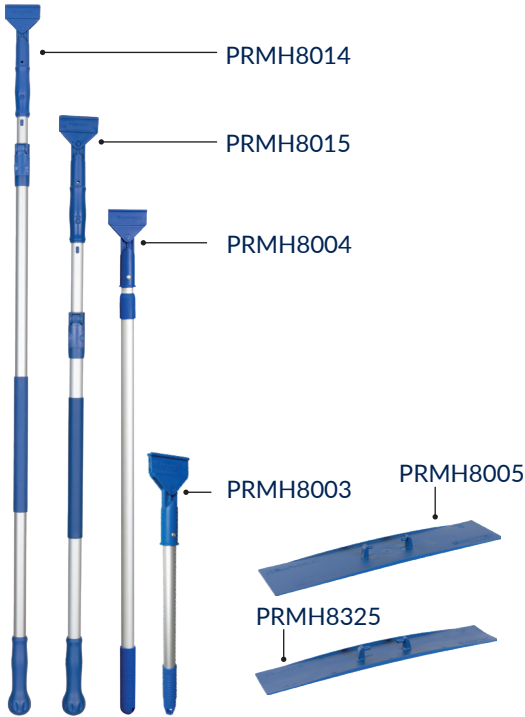

CURVED FRAME FOR EVEN PRESSURE

The ZeroGravity® Mopping System is engineered to help cleaning teams and EVS staff work more effectively. The innovative curved shape of the ZeroGravity Mop Frame flexes to flatten completely when normal cleaning pressure is applied. This results in more evenly distributed cleaning power and more efficient use of mop pads.

Features			
ZeroGravity Mop Frame is 100% recyclable polypropylene			
Curved profile enables use of the entire mop for better overall value			
Lightweight design helps reduce operator strain compared to traditional mops			

Part No.	Description	Size	Packaging

ZeroGravity® QuickChange™ Connectors for Mopping

Seamless compatibility, smarter transitions - the perfect pairing of ZeroGravity® Mopping System

Stationary Z-Clip Connector - PRMH1003

Lightweight handle allows for the most versatile, ergonomic clean. Comes standard with ZeroGravity Mopping poles.

Adjustable Z-Clip Connector - PRMH1004

Adjustable head is perfect for cleaning floors, walls, and ceilings with the ability to restrict side-to-side motion.

Original Claw Mop Connector - PRMH1005

The Original Class connector is adjustable for any size string mops.

Touchless Claw Mop Connector - PRMH1020

The Touchless Claw Mop Connector offers hands-free removal of used string mops.

Multi-Purpose Frame - PRMH2007

The ultimate 3-in-1 tool: a broom, a squeegee, and a mop.

ZeroGravity® QuickChange™ Connectors for Dusting

Use with Premira Microfiber High Duster XF covers (PRMW0112)

High Duster XF - PRMH2005

Disinfectable, flexible tool conforms to clean irregular, hard-to-reach spaces

Use with Premira Microfiber Standard High Duster covers (PRMW0001)

Standard High Duster - PRMH1001

Flexible frame reaches areas where typical dusters cannot.
