

# MissionMops™ Disposable String Mop Family

**Single-use mops engineered for heavy liquid cleanup and safer, faster turnover in critical healthcare spaces.**

MissionMops™ is Contec Professional's high-performance line of disposable string mops specifically crafted for large-volume spill areas like ORs, Labor & Delivery, and procedural suites. Each mop in the MissionMops family is designed with the unique needs of EVS teams in mind—providing superior fluid management, enhanced infection control, and operational efficiency.

The MissionMops line features three differentiated mop types to meet a variety of spill and debris removal needs:

- **MissionMops™ Eco Mop:** Made from 98% post-industrial nonwovens and part of Contec's EcoShield™ portfolio, this mop is ideal for surgical suites. With high absorbency and individually bagged packaging, it provides a hygienic, sustainable solution for quick turnover between procedures. Also useful in large-scale spills in a wide variety of healthcare environments.
  - Available in compressed packaging for reduced storage
- **MissionMops™ Selvage Mop:** Repurposed from Contec's proprietary microfiber material, this version offers excellent debris trapping (hair, dirt, bone fragments) alongside fluid absorption. Best used with Contec's ZeroGravity™ QuickChange system for safe, touchless disposal.

MissionMops™ disposable string mops are engineered to tackle high-fluid environments like ORs, helping EVS teams clean quickly, thoroughly, and sustainably.

The EcoShield™ badge identifies products that deliver high-level performance without compromising the environment.

## Features

Single-Use Hygiene: All MissionMops are disposable to reduce cross-contamination risks.

Rapid Absorption: Quickly soak up blood, saline, and other OR fluids.

Eco-Conscious Options: EcoShield-qualified variants support your facility's sustainability goals.

ZeroGravity™ Compatible: Touchless, ergonomic hardware options improve staff safety and efficiency.
